Author Index

ADAM, J. A.
Complex eigenvalue bounds in magnetoatmospheric shear flow. II, P. S. Cally and J. A. Adam, (**1**), 57–67

ARONS, J.
Plasma astrophysics: nonthermal processes in diffuse magnetized plasmas. Volume 2: Astrophysical applications, by D. B. Melrose. Book reviewed by J. Arons, (**4**), 335–338.

AZOUNI, M. A.
Thermoconvective instabilities in a vertical cylinder of water with maximum density effects. Part 1. Experiments, M. A. Azouni and C. Normand, (**3**), 209–221

Thermoconvective instabilities in a vertical cylinder of water with maximum density effects. Part 2. Theory: onset of convection, M. A. Azouni and C. Normand, (**3**), 223–245

BANKS, R. J.
Geoelectromagnetic investigation of the Earth's crust and mantle, by I. I. Rokityansky. Book reviewed by R. J. Banks, (**4**), 341–344

BOOK, D. L.
Finite-difference techniques for vectorized fluid dynamics calculations, edited by D. L. Book. Book review, (**4**), 344–345

BUSSE, F. H.
A model of mean zonal flows in the major planets, F. H. Busse, (**2**), 153–174

Character and stability of axisymmetric thermal convection in spheres and spherical shells, A. Zebib, G. Schubert, J. L. Dein and R. C. Paliwal, with an appendix by F. H. Busse, (**1**), 1–42

CALLY, P. S.
Complex eigenvalue bounds in magnetoatmospheric shear flow. I, P. S. Cally, (**1**), 43–55

Complex eigenvalue bounds in magnetoatmospheric shear flow. II, P. S. Cally and J. A. Adam, (**1**), 57–67

CARNEVALE, G. F.
A statistical dynamical theory of strongly nonlinear internal gravity waves, G. F. Carnevale and J. S. Frederiksen, (**3**), 175–207

CARSWELL, R. F.
Investigating the universe, edited by F. D. Kahn. Book reviewed by R. F. Carswell (**4**), 339–340

DAVIS, A. M. J.
Shelf similar topographies for free continental shelf waves, A. M. J. Davis, (**4**), 321–331

DEIN, J. L.
Character and stability of axisymmetric thermal convection in spheres and spherical shells, A. Zebib, G. Schubert, J. L. Dein and R. C. Paliwal, (**1**), 1–42

DROBYSHEVSKI, E. M.
Topological semi-dynamos, E. M. Drobyshevski, E. N. Kolesnikova and V. S. Yuferev, (**2**), 103–125

FREDERIKSEN, J. S.
A statistical dynamical theory of strongly nonlinear internal gravity waves, G. F. Carnevale and J. S. Frederiksen, (**3**), 175–207

GUCKENHEIMER, J.
Nonlinear convection in a rotating layer: amplitude expansions and normal forms, J. Guckenheimer and E. Knobloch, (**4**), 247–272

HYUN, J. M.
Axisymmetric flows in spin-up from rest of a stratified fluid in a cylinder, J. M. Hyun, (**2**), 127–141

Spin-up of a thermally stratified fluid in a cylinder with a conducting sidewall, J. M. Hyun, (**2**), 143–152

JOHNSON, J. A.
A model of secondary upwelling over the shelf break, J. A. Johnson and A. J. G. Nurser, (**4**), 301–320

KAHN, F. D.
Investigating the universe, edited by F. D. Kahn. Book review, (**4**), 339–340

KNOBLOCH, E.
Nonlinear convection in a rotating layer: amplitude expansions and normal forms, J. Guckenheimer and E. Knobloch, (**4**), 247–272

KOLESNIKOVA, E. N.
Topological semi-dynamos, E. M. Drobyshevski, E. N. Kolesnikova and V. S. Yuferev, (**2**), 103–125

MELROSE, D. B.
Plasma astrophysics: nonthermal processes in diffuse magnetized plasmas. Volume 2. Astrophysical applications, by D. B. Melrose. Book review, (**4**), 335–338

MESTEL, L.
Highlights of astronomy, Volume 5, edited by P. A. Wayman. Book reviewed by L. Mestel, (**4**), 333–335

NORMAND, C.
Thermoconvective instabilities in a vertical cyclinder of water with maximum density effects. Part 1. Experiments, M. A. Azouni and C. Normand, (**3**), 209–221

Thermoconvective instabilities in a vertical cylinder of water with maximum density effects. Part 2. Theory: onset of convection, M. A. Azouni and C. Normand, (**3**), 223–245

NURSER, A. J. G.
A model of secondary upwelling over the shelf break, J. A. Johnson and A. J. G. Nurser, (**4**), 301–320

PALIWAL, R. C.
Character and stability of axisymmetric thermal convection in spheres and spherical shells, A. Zebib, G. Schubert, J. L. Dein and R. C. Paliwal, (**1**), 1–42

PARKER, E. N.
Absence of equilibrium among close-packed twisted flux tubes, E. N. Parker, (**2**), 85–102

ROKITYANSKY, I. I.
Geoelectromagnetic investigation of the Earth's crust and mantle by I. I. Rokityansky. Book review, (**4**), 341–344

SCHUBERT, G.
Character and stability of axisymmetric thermal convection in spheres and spherical shells, A. Zebib, G. Schubert, J. L. Dein and R. C. Paliwal, (**1**), 1–42

SPEZIALE, C. G.
Closure models for rotating two-dimensional turbulence, C. G. Speziale, (**1**), 69–84

WAYMAN, P. A.
Highlights of astronomy, Volume 5, edited by P. A. Wayman. Book review, (**4**), 333–335

WEISS, N. O.
Finite-difference techniques for vectorized fluid dynamics calculations, edited by D. L. Book. Book reviewed by N. O. Weiss, (**4**), 344–345

WILLMOTT, A. J.
The influence of a coastal headland on oceanic boundary currents, A. J. Willmott, (**4**), 273–299

YUFEREV, V. S.
Topological semi-dynamos, E. M. Drobyshevski, E. N. Kolesnikova and V. S. Yuferev, (**2**), 103–125

ZEBIB, A.
Character and stability of axisymmetric thermal convection in spheres and spherical shells, A. Zebib, G. Schubert, J. L. Dein and R. C. Paliwal, (**1**), 1–42

Geophys. Astrophys. Fluid Dynamics. 1983, Index to Vol. 23

Subject Index

ASTRONOMY

Highlights of astronomy, Volume 5, edited by P. A. Wayman. Book review, (**4**), 333–335

Investigating the universe, edited by F. D. Kahn. Book review, (**4**), 339–340

AXISYMMETRIC FLOWS

Axisymmetric flows in spin-up from rest of a stratified fluid in a cylinder, J. M. Hyun, (**2**), 127–141

Character and stability of axisymmetric thermal convection in spheres and spherical shells, A. Zebib, G. Schubert, J. L. Dein and R. C. Paliwal, (**1**), 1–42

BOOK REVIEWS

Finite-difference techniques for vectorized fluid dynamics calculations, edited by D. L. Book, (**4**), 344–345

Geoelectromagnetic investigation of the Earth's crust and mantle, by I. I. Rokityansky, (**4**), 341–344

Highlights of astronomy, Volume 5, edited by P. A. Wayman, (**4**), 333–335

Investigating the universe, edited by F. D. Kahn, (**4**), 339–340

Plasma astrophysics: nonthermal processes in diffuse magnetized plasmas. Volume 2: astrophysical applications, by D. B. Melrose, (**4**), 335–338

COASTLINE

The influence of a coastal headland on oceanic boundary currents, A. J. Willmott, (**4**), 273–299

CLOSURE HYPOTHESIS

A statistical dynamical theory of strongly nonlinear internal gravity waves, G. F. Carnevale and J. S. Frederiksen, (**3**), 175–207

CLOSURE MODELS

Closure models for rotating two-dimensional turbulence, C. G. Speziale, (**1**), 69–84

CONTINENTAL SHELVES

A model of secondary upwelling over the shelf break, J. A. Johnson and A. J. G. Nurser, (**4**), 301–320

Shelf similar topographies for free continental shelf waves, A. M. J. Davis, (**4**), 321–331

CONVECTION

Character and stability of axisymmetric thermal convection in spheres and spherical shells, A. Zebib, G. Schubert, J. L. Dein and R. C. Paliwal, (**1**), 1–42

Nonlinear convection in a rotating layer: amplitude expansions and normal forms, J. Guckenheimer and E. Knobloch, (**4**), 247–272

CONVECTION
Thermoconvective instabilities in a vertical cylinder of water with maximum density effects. Part 1. Experiments, M. A. Azouni and C. Normand, (3), 209–221

Thermoconvective instabilities in a vertical cylinder of water with maximum density effects. Part 2. Theory: onset of convection, M. A. Azouni and C. Normand, (3), 223–245

DYNAMO PROCESSES
Topological semi-dynamos, E. M. Drobyshevski, E. N. Kolesnikova and V. S. Yuferev, (2), 103–125

EARTH'S CRUST
Geoelectromagnetic investigation of the Earth's crust and mantle, by I. I. Rokityansky. Book review, (4), 341–344

EARTH'S MANTLE
Geoelectromagnetic investigation of the Earth's crust and mantle, by I. I. Rokityansky. Book review, (4), 341–344

FLUX TUBES
Absence of equilibrium among close-packed twisted flux tubes, E. N. Parker, (2), 85–102

GEOMAGNETISM
Geoelectromagnetic investigation of the Earth's crust and mantle, by I. I. Rokityansky. Book review, (4), 341–344

INTERNAL GRAVITY WAVES
A statistical dynamical theory of strongly nonlinear internal gravity waves, G. F. Carnevale and J. S. Frederiksen, (3), 175–207

JUPITER
A model of mean zonal flows in the major planets, F. H. Busse, (2), 153–174

MAGNETOATMOSPHERES
Complex eigenvalue bounds in magnetoatmospheric shear flow. I, P. S. Cally, (1), 43–55

Complex eigenvalue bounds in magnetoatmospheric shear flow, II, P. S. Cally and J. A. Adam, (1), 57–67

MAGNETOHYDRODYNAMICS
Absence of equilibrium among close-packed twisted flux tubes, E. N. Parker, (2), 85–102

Complex eigenvalue bounds in magnetatmospheric shear flow. I, P. S. Cally, (1), 43–55

Complex eigenvalue bounds in magnetoatmospheric shear flow. II, P. S. Cally and J. A. Adam, (1), 57–67

Topological semi-dynamos, E. M. Drobyshevski, E. N. Kolesnikova and V. S. Yuferev, (2), 103–125

MEAN FLOWS
A model of mean zonal flows in the major planets, F. H. Busse, (2), 153–174.

OCEAN CIRCULATION

A model of secondary upswelling over the shelf break, J. A. Johnson and A. J. G. Nurser, (**4**), 301–320

OCEAN CURRENTS

The influence of a coastal headland on oceanic boundary currents, A. J. Willmott, (**4**), 273–299

PLANETARY ATMOSPHERES

A model of mean zonal flows in the major planets, F. H. Busse, (**2**), 153–174

PLASMAS

Plasma astrophysics: nonthermal processes in diffuse magnetized plasmas. Volume 2: astrophysical applications, by D. B. Melrose. Book review, (**4**), 335–338

ROTATING FLUIDS

Character and stability of axisymmetric thermal convection in spheres and spherical shells, A. Zebib, G. Schubert, J. L. Dein and R. C. Paliwal, (**1**), 1–42

ROTATING STRATIFIED FLUIDS

Closure models for rotating two-dimensional turbulence, C. G. Speziale, (**1**), 69–84

Nonlinear convection in a rotating layer: amplitude expansions and normal forms, J. Guckenheimer and E. Knobloch, (**4**), 247–272

SATURN

A model of mean zonal flows in the major planets, F. H. Busse, (**2**), 153–174

SHEAR FLOWS

Complex eigenvalue bounds in magnetoatmospheric shear flow. I, P. S. Cally, (**1**), 43–55

Complex eigenvalue bounds in magnetoatmospheric shear flow. II, P. S. Cally and J. A. Adam, (**1**), 57–67

SHELF-WAVES

A model of secondary upwelling over the shelf break, J. A. Johnson and A. J. G. Nurser, (**4**), 301–320

Shelf similar topographies for free continental shelf waves, A. M. J. Davis, (**4**), 321–331

SPIN-UP

Axisymmetric flows in spin-up from rest of a stratified fluid in a cylinder, J. M. Hyun, (**2**), 127–141

Spin-up of a thermally stratified fluid in a cylinder with a conducting sidewall, J. M. Hyun, (**2**), 143–152

STABILITY

Character and stability of axisymmetric thermal convection in spheres and spherical shells, A. Zebib, G. Schubert, J. L. Dein and R. C. Paliwal, (**1**), 1–42

Thermoconvective instabilities in a vertical cylinder of water with maximum density effects. Part 1. Experiments, M. A. Azouni and C. Normand, (**3**), 209–221

Thermoconvective instabilities in a vertical cylinder of water with maximum density effects. Part 2. Theory: onset of convection, M. A. Azouni and C. Normand, (**3**), 223–245

STRATIFIED FLUIDS

Axisymmetric flows in spin-up from rest of a stratified fluid in a cylinder, J. M. Hyun, (**2**), 127–141

Complex eigenvalue bounds in magnetoatmospheric shear flow. I, P. S. Cally, (**1**), 43–55

Complex eigenvalue bounds in magnetoatmospheric shear flow. II, P. S. Cally and J. A. Adam, (**1**), 57–67

Spin-up of a thermally stratified fluid in a cylinder with a conducting sidewall, J. M. Hyun, (**2**), 143–152

SUN

Topological semi-dynamos, E. M. Drobyshevski, E. N. Kolesnikova and V. S. Yuferev, (**2**), 103–125

TOPOGRAPHIC EFFECTS

A model of secondary upwelling over the shelf break, J. A. Johnson and A. J. G. Nurser, (**4**), 301–320

Shelf similar topographies for free continental shelf waves, A. M. J. Davis, (**4**), 321–331

The influence of a coastal headland on oceanic boundary currents, A. J. Willmott, (**4**), 273–299

TURBULENCE

A statistical dynamical theory of strongly nonlinear internal gravity waves, G. F. Carnevale and J. S. Frederiksen, (**3**), 175–207

Closure models for rotating two-dimensional turbulence, C. G. Speziale, (**1**), 69–84

UPWELLING

A model of secondary upwelling over the shelf break, J. A. Johnson and A. J. G. Nurser, (**4**), 301–320

VECTOR PROCESSORS

Finite-difference techniques for vectorized fluid dynamics calculations, edited by D. L. Book. Book review, (**4**), 344–345

ZONAL FLOWS

A model of mean zonal flows in the major planets, F. H. Busse, (**2**), 153–174
